Item Description

Verify and ensure that all speaker wires are coiled and secured to the float with Velcro ties.

Visually check tire pressure and condition including spare tire.

Ensure side sign frames are tied down to frame bars with tape straps.

Check condition of safety chains (2) and verify proper cross-connect to tow vehicle.

Check condition of electrical connector. Verify proper connection by operating light check (turn, running, flasher and brake.)

Verify safety wire is clipped securely to the tow vehicle.

Ensure hitch locking collar has been seated in the forward position, locking tab is down and the safety pin has been inserted.

Final visual walk around: No loose wires and connections are secure.
